

Adaptive Technology Demonstration

Springfield, MO

September 27, 2005

Would you like to experience some of the **newest assistive technology** on the market today? Would you like to speak in person with a product representative regarding **technical issues**? Or do you just want to get your hands on new technology to decide **how it could work for you or your clients**?

If so, please attend an Adaptive Technology Demonstration hosted by Missouri State University and NanoPac, Inc. Just drop in any time between 9a.m. and 5p.m. to view and use the products of interest to you.

Location:

Old Great Southern Bank Building
On the corner of Elm and South street.
430 South Street, 2nd floor conference room
Springfield, 65806
Parking is free.

Refreshments will be available at this casual demonstration. The following products and more will be on display:

Freedom Scientific blindness and low vision – JAWS, MAGic, OpenBook, PAC Mate, Focus Braille displays, SARA.

Humanware – BrailleNote, Maestro

Optelec Blindness – Mountbatten Brailier, Dolphin Supernova, EZ Link. Mobile Speak, Voyager Braille display.

GW Micro – Window-Eyes, Braille Sense.

Enhanced Vision – Merlin CCTV, Jordy, Flipper Panel, Acrobat.
